

COURSE DESCRIPTION (9 Holes Par 3)

HOLE 1 - 150 m.

A short hole to get you started with club selection vital depending on which way the wind is blowing, possibly changing your selection by up to 2 clubs. Out of bounds right with a bunker guarding the green on the left.

HOLE 2 - 125 m.

A precise shot needed on this short hole. Pay particular attention to the pin position as water on the left and a bunker on the right can easily come into play.

HOLE 3 - 115 m.

One of the shortest holes on the course but don't be fooled into thinking it's easy. Good club selection and caution to the water on the left is paramount to playing this hole well.

HOLE 4 - 120 m.

A tough little hole with 2 bunkers guarding the green to the left and the right. The best way to play it is to go long and then have an easy putt downhill.

HOLE 5 - 100 m.

One of the more interesting holes on the Par 3 course with water on the left and a small valley to the right, a shot over the green will result in a very complicated chip shot back to the green.

HOLE 6 - 180 m.

The longest hole on the course with players usually taking a 3 wood to reach the green. The hole plays it's hardest when the pin is tucked to the right bringing in the big bunker guarding the front right of the green.

HOLE 7 - 130 m.

Another test of a hole with the green set above the tee with water surrounding the back of the green. Stray right of the green and you'll find a strategically placed bunker. Without doubt one of the hardest holes on the Par 3 course.

HOLE 8 - 160 m.

Again another test for club selection as wind plays a major factor on this hole. Although the green is very wide it is guarded by a bunker on the left so hitting the green is paramount to playing it well.

HOLE 9 - 168 m.

The 9th is a great finishing hole with a challenge over the lake to the green with bunkers at the ready at the front. The biggest test is club selection as the hole looks shorter from the tee than it actually is.
